Dr. Creager is Professor and Chair of the Department of Chemistry at Clemson University in Clemson, SC. He earned his Ph.D. in analytical chemistry from the University of North Carolina at Chapel Hill in 1987, and worked as a postdoctoral research associate at the University of Texas at Austin from 1987 to 1989 before accepting his first academic appointment at Indiana University where he served until 1995 when he moved to Clemson. He directs an academic research group focusing on synthesis and characterization of new materials, particularly new electrolytes and electrodes, for use in electrochemical power sources including fuel cells, electrolyzers, batteries and capacitors. He has taught undergraduate-level analytical chemistry and graduate-level electrochemistry classes since 1990, he has taught specialized versions of a course in electrochemical science to audiences in private industry and at other universities since 1999, and he has served as a consultant in the general area of electrochemical science since 1996. He has published over 80 articles in the general area of electrochemical science and served as thesis advisor to 20 students and had advised multiple postdocs and visiting scientists.
